Partnership to provide secure, compliant, ERP-integrated [credit card processing](#) on the road and at tradeshow

MESA, AZ (PRWEB) December 12, 2017

Earlier today, American Payment Solutions (APS) announced their new partnership with iSOFT Systems, LLC, to provide secure, [PCI compliant](#), anywhere/anytime [credit card processing](#) for SMBs using AccountMate.

APS is a leading credit card processing provider, helping businesses save money and time with seamless ERP-integrated credit card transactions. With their affiliated partner, North American Payment Solutions, APS supports customers in the United States and Canada.

"APS is proud of this exciting partnership with iSOFT," said Phillip Heath, President of American Payment Solutions. "By combining the competitive processing rates and state-of-the-art security of APS with the flexible mobility of AccountMate-integrated AMmobile, we're empowering SMBs with error-free, fast payment processing on the go."

AMmobile assists sales teams to close out-of-office deals faster with insight into real-time quantities and delivery dates, instant quotes, signature captures, and immediate receipts. With the APS partnership, the solution will also be able to process secure payments in the field. AMmobile was written specifically for iOS devices for enhanced security as well as a rich, simple user experience.

"Online security is becoming increasingly important for consumers," said David Ford, CEO of American Payment Solutions. "By providing a highly secure payment gateway, complete with PCI-compliance and tokenization, as well as signature APS services such as 11-hour funding and the private APSPAYS Vault, AccountMate businesses will now have access to enterprise-quality payment processing options wherever they are."
