

DocuFire Credit Card Express

Product Description

Automatically charge recurring Invoices by Credit Card with no user intervention required. DocuFire CCX utilizes Authorize.net for PCI compliance and your customer's cardholder information is stored off-site in their secure facility eliminating your exposure to liability.

The process works by simply printing your Orders and/or Invoices to DocuFire Printer and we use the pay code to trigger the charge. The system supports Pre-authorizations at the Order Entry stage and Capture for settlement at the Invoice stage.

Also, invoices can easily be charged by Credit Card after the fact and multiple invoices and credits can be consolidated and processed via a single transaction.

No modifications are required for AccountMate and we use your existing system as-is making implementation a snap and you will never have to re-key information again as you do today and you will eliminate mistakes.

Try DocuFire free for 30 days and see how this powerful solution can save you time and money.

Company Profile

Since 1999 DocuFire has specialized in automating document delivery and credit card processing for businesses across North America. Our solutions have saved thousands of trees, millions of dollars in mailing costs and thousands of hours in labor. Our solutions are designed for B2B companies that require the utmost in automation and flexibility. Try DocuFire free for 30 days and see for yourself how easy it is.
