ANALYSIS & INFORMATION SERVICES
Expert Automation with Integrity

AIS FastEntry

Product Description

AIS FastEntry is a customizable software solution designed to streamline time and material tracking within AccountMate ERP. FastEntry simplifies the process of recording time updates and tracking activity statuses, providing valuable insights into job costing, project management, and profitability. Additionally, clients have added a wide range of functionalities to the AIS FastEntry software solution, such as item movement down to a bin level, item putaway, picking, shipping, carton management, and finished goods entry.

AIS FastEntry offers reliable data storage and syncing capabilities for uninterrupted workflow. By saving data locally on the device, FastEntry allows workers to continue recording time, materials, and other information even during internet outages. Once the internet connection is restored, the locally stored data seamlessly syncs with AccountMate, ensuring data integrity and accurate transfer of information.

By utilizing barcode scanning and user-friendly touch-screen interactions, workers can effortlessly log in, start the time clock, and record project-specific details. The integration with AccountMate ERP ensures accurate tracking of labor hours, materials used, and finished goods, which automatically synchronized with payroll, job costing, manufacturing, and project management functionalities.

Company Profile

Analysis & Information Services (AIS) is a highly reputable AccountMate Solution Provider, with a rich history dating back to the early 1990s. As one of the pioneering members of the AccountMate Solution Provider group, AIS has consistently delivered exceptional solutions. Recognized as the Most Valuable Partner by AccountMate both nationally and regionally, AIS recently received the Sales Manager's Award in recognition of their outstanding service. Specializing in custom manufacturing and complex inventory management software, AIS offers strategic consulting, tailored design, meticulous programming, and seamless implementation of accounting and workflow software that aligns precisely with their clients' unique business needs.

Third party software included on this site has not been tested and is not endorsed by AccountMate Software. Technical support, warranties, and compatibility are the responsibility of the issuing company.

KEY FEATURES

- Because it's integrated with AccountMate, it costs less per user than other time card apps
- No need to purchase desktop computers and user licenses of AccountMate for the warehouse, shop or job site, because all tracking happens on workers' phones which send the data into AccountMate.
- The whole team has visibility into the project. Requirement's planning is simplified, work is documented as it happens, and profitability is easily assessed.
- This gives you transparency at the sales and customer service level
- Workers use their phones to scan in the materials they use as they work, which automatically assigns those materials to the current job number

PRODUCT COMPATIBILITY

AccountMate SQL/Express v10 – current
