

AIS JobBoard

Product Description

AIS JobBoard is a web based remote access browser-based application that automates to an existing AccountMate SQL and Express account. Without having to log onto a machine to input live data creates more efficiency. Quotes, order status, job allocations for manufacturing or distribution, scheduling, shipping, delivery, installation, inspection, and detailed activity are provided with the click of a button.

Opening the AIS JobBoard dashboard, it shows quotes, orders, jobs, and all documents related to them. A top-level scan that is color oriented based on changes in status. The activity view shows specific project requirements, activity and related documents, as well as the job, customer, department, and status.

Company Profile

With over 30 years of experience, Analysis and Information Services is an efficient charter member and solution partner member for AccountMate. Our expertise in evolving software advancements and developing vertical applications provides efficient services for a variety of industries. We are committed to supporting the business partner channel and providing applications that increase the AccountMate return on investment.

KEY FEATURES

- Automated refreshing sequence allows the view of current job statuses and deadlines to never miss an error.
- Color coordinated project, deadlines, and requirements make it easy to view and understand.
- Remote access on any smart phone and machine means no installation time.
