MKT Setup

Product Description

MKT Setup is an invaluable resource for anyone that modifies AccountMate software. MKT Setup is easy to use and allows for fast and professional implementation of your client or in-house modifications, vertical products, and add-on products.

A programmer would enter the appropriate information in the MKT Setup tables using Visual FoxPro and then send the MKT Setup program and files to the client. The client would run MKT Setup and the changes designed by the programmer would be implemented on the clients system.

When used with an installation program like InstallShield, MKT Setup provides a seamless, intuitive, and complete solution to updating your clients for your products or modifications.

Company Profile

Bailey Enterprises is a family business birthed from a vision of creating opportunity. A general partnership between Levi Bailey, the eldest of three sons and his father Bill. Our desire is to make doing business easy, so the AccountMate Solution Provider can add value quickly.
