Nowsight™ by Nowsight™

Product Description

Your business has no shortage of data—what you need is the right person, to have the right data, at the right moment to drive your business forward. Nowsight creates action-driven business dashboards—no coding, or build-out on your end required.

Nowsight™ stiches together all of your data sources to create a real-time, always-on, view of your company, that you can access 24/7/365. We help get the results you need to grow your business using powerful visualizations, prescriptive insights, and automated alerts. Nowsight™ gives you the information you need to increase revenue and profitability.

We use the APIs from all of the most popular web-based applications to import your cloud, spreadsheet, and application data into Nowsight™ and give you one true version of where you are and where you're going.

With a diverse team of experts who can quickly understand the key drivers of your unique company, Nowsight™ provides an invaluable approach to helping you run your company the way YOU want to run it – without inflexible software programs, long implementation times, and expensive business analyst labor or consulting costs.

Nowsight developed AccountMate-specific Simple BI to give small-to-medium businesses an off-the-shelf Business Intelligence solution that arms you with key insights—in an easy-to-use format—without the cost of a highly customized solution.

Deeply customized dashboards and insight applications are also available, along with Nowtrack—a ground-breaking manufacturing solution that works with virtually any manufacturing operations. Nowtrack wirelessly tracks output/throughput, line speed, downtime incidents, yield, history, and more—no **matter how modern or dated your production equipment may be!**

Company Profile

Nowsight was built by business leaders, for business leaders. With white-glove implementation we believe you should stay focused on the business, not connecting your data systems. Sitting on top of all of your company's core software systems, Nowsight provides immediate visibility and surfaces actions to improve revenue and profitability. The interface is as intuitive as a web page and personalized to each appropriate team member across the organization. (And with no per-seat fees, you won't pay more to give everyone appropriate access to your core data and metrics.) We are passionate about showing businesses the value that's trapped inside your current data. Give us a call!

Third party software included on this site has not been tested and is not endorsed by AccountMate Software. Technical support, warranties, and compatibility are the responsibility of the issuing company.
