

Point of Sale (POS.NET™)

Product Description

Prism Visual Software's POS solution is a modern Point of Sale application that is easy to use and contains a full integration with AccountMate. This application is directly integrated with AccountMate's Accounts Receivables (AR) Module and leverages its procedures to make a seamless, one-stop POS solution without creating additional data entry for users. The application works with existing customers and guests in which invoices become generated and are available in AccountMate.

POS users have buttons for commonly requested items and smart search capabilities to sell shoppers quickly. In addition, the POS user can scan barcodes and use touch screens to checkout customers with ease. Easily checkout guest customers or existing customers. Quickly pull up customers by phone number or perform a more advanced search. For an existing customer, look up AccountMate's balance information and past invoices. Allow a customer to put money on account during the checkout process in a couple quick steps.

Prism's POS is a standalone register application that runs on either a windows desktop or mobile tablet. The computer does not need AccountMate installed. Prism POS just needs to be connected to the same instance as SQL and AccountMate. Your company can have multiple POS users and multiple registers.

The Point of Sale solution is integrated with Bolt devices to scan and charge credit cards, handle returns, and void transactions. It also supports USB and Serial barcode scanners to increase accuracy and speed.

Company Profile

Prism Visual Software is a leading developer of operational software for route sales, pre-order delivery, and equipment service. Through desktop and mobile applications, Prism Visual Software enables customers to plan, optimize and execute their business operations with effectiveness, efficiency and proven technologies for continued growth and success. As the creator of a patented mobile app for Android, its technology powers a broad range of industries with mobile employees. Prism's platform is built on Microsoft .Net and SQL Server and published as desktop, web and Android applications. Prism's software suite has seamlessly integrated with AccountMate's financial software for over 15 years.

Third party software included on this site has not been tested and is not endorsed by AccountMate Software. Technical support, warranties, and compatibility are the responsibility of the issuing company.
